

# Artificial Intelligence (AI) in CorelDRAW products – FAQ

## Using Artificial Intelligence (AI)

### Is CorelDRAW trying to replace artists with AI?

Absolutely not. CorelDRAW's AI Generate feature is designed to empower your creativity, not replace it. We're committed to supporting artists' workflows and keeping human art at the heart of everything we do. In fact, CorelDRAW showcases the designs our users create as part of our brand to highlight their talent, give them exposure, and celebrate the artist community. Interested in collaborating with us? Check out how to get involved:

### I cannot access the Generative AI features in my CorelDRAW product.

#### What is the issue?

To use the Generative AI features, you must accept the GenAI policy and confirm that you are 18 or older. If you do not accept the policy, the features will not work.

If you have accepted the policy and are still encountering problems, there may be a temporary outage. If the problem persists, please report the problem to our support team ([coreldraw.com/support](https://coreldraw.com/support)) for further help.

### Can I use the images I generate with CorelDRAW AI tools commercially?

Yes. Images generated with CorelDRAW AI tools may be used commercially. However, AI-generated content may not be unique and could potentially infringe third-party rights, including copyright, trademark or rights of publicity. You are solely responsible for ensuring that the content complies with applicable laws and is safe for commercial use.

For more information, please refer to the CorelDRAW Gen AI policy –

[www.corel.com/en/generative-ai/](https://www.corel.com/en/generative-ai/)

### Do I need to disclose that I used AI when I share or sell my work?

Disclosure requirements vary depending on jurisdiction, platform rules and context. It is your responsibility to determine whether disclosure of AI-generated content is required. For example, in the EU, it is required to disclose when content is generated entirely or significantly by AI. This helps recipients distinguish between AI-generated and human-created content. Outside these jurisdictions, disclosure is generally optional, though

considered best practice. Some platforms or marketplaces may have their own disclosure requirements.

## **Will CorelDRAW’s AI protect me from generating trademarked content or likenesses of real people, so I don’t get into trouble as an artist?**

No. CorelDRAW’s AI tools use third-party models that may generate trademarked content or real people’s likeness if prompted. As such, it is your responsibility for ensuring that AI-generated content does not infringe third-party intellectual property rights or personal rights, and for complying with all applicable laws..

For more information, please refer to the [CorelDRAW Gen AI policy](#).

## **Privacy and Personal Data**

### **Is my data/ content I upload or generate used to train AI models?**

No, your data and images are not used to train AI models. The AI tools use third-party AI models to create outputs. These models are not trained on any data you provide.

### **Are you tracking information about how I use AI?**

Use of AI Features may be logged (e.g., timestamps, input metadata) for debugging, safety, and compliance and tracked for analytics and trends. However, Corel does not have visibility into how specific users are using the features.

## **AI Models**

### **Which AI models are used for generative AI in CorelDRAW products?**

Below is a snapshot of the models current available in CorelDRAW, with a short description of each model, and the number of credits used by each model (as of March 2026):

<b>Model</b>	<b>Description</b>	<b>Credits used per generation</b>
<b>Nano Banana Pro</b>	Supports 2K image generation and advanced text rendering. High prompt accuracy. Very strong reference image fidelity. Fast.	86 credits
<b>Nano Banana</b>	Focused on guided editing and transformations, with emphasis on keeping key	16 credits

	elements in reference images. Good for short, concise prompts. Very fast.	
<b>Flux Kontext Pro</b>	High-fidelity generation with strong prompt accuracy, excellent reference image interpretation, and advanced editing and refinement capabilities. Moderate speed.	30 credits
<b>Stable Diffusion 3.5 Medium</b>	Faster and less resource-intensive than Stable Diffusion 3.5 Large, with lower fidelity and fewer fine details in complex scenes but still capable of producing versatile, good-quality images. Fast performance.	22 credits
<b>Stable Diffusion 3.5 Large</b>	High-quality text-to-image generation with strong detail, rich textures, and reliable handling of complex scenes, lighting, and compositions. Moderate speed.	42 credits
<b>Flux Schnell</b>	Extremely fast generation optimized for producing many variations and exploring ideas quickly. Less effective for precise, detail-oriented edits.	2 credits

*Model availability and credit rate are subject to change.*

For detailed information about each model, visit the official model pages.

- Stable Diffusion Medium and Large: <https://stability.ai/stable-image>
- Flux Kontext: <https://bfl.ai/models/flux-kontext>
- Nano Banana and Nano Banana Pro: <https://gemini.google/us/overview/image-generation/>

For more information about AI credits, see the AI credits section and questions below.

**Will Corel be bringing other models to the CorelDRAW products?**

Corel is constantly evaluating available/upcoming AI models for integration in CorelDRAW products to deliver the best results for our customers’ use cases. Updates will be shared as new models become available.

**AI credits**

## What are AI credits?

AI credits determine how many times you can use Generative AI tools. There are three categories of credits – free trial, recurring, and non-recurring – each with specific rules for allocation and expiration. Trial credits do not recur after a free trial ends. Recurring credits are allocated monthly and reset at the start of each month. Non-recurring credits never expire; they are tied to products you buy once and own for perpetual use.

## What features and products use AI credits?

AI credits are used in CorelDRAW Graphics Suite, CorelDRAW Technical Suite, and CorelDRAW Go. Each time you generate an image with the Generative AI tools in Corel products, the model you choose consumes a specific number of credits.

The features that use AI credits include:

CorelDRAW Graphics Suite and CorelDRAW Technical Suite	AI Generate docker/inspector (Generate Image, Remix Image)
CorelDRAW Go	AI Generate

## How many AI credits do I get with my license?

Corel allots credit amounts based on license type for each product.

Product	License Type	Allotment
CorelDRAW Go	Subscription	1000 credits/month
CorelDRAW Graphics Suite and CorelDRAW Technical Suite	One-time-purchase (perpetual use)	2000 credits (one-time-allotment)
	Subscription or Maintenance	2000 credits/month /seat
	Education Subscription or Maintenance	500 credits/month/seat
	Education One-time-purchase (perpetual use)	1000 credits (one-time-allotment)

*Allotment amounts for Corel product licenses are subject to change.*

## How do I manage my credits?

You can view your total credits amount by going to the [AI Credits section in My Account](#). All products and licenses that contribute to your total AI credit balance will be listed on this page.

## Can I purchase additional credits?

Yes! You can purchase additional credit packs by visiting [www.coreldraw.com/creditpacks/](http://www.coreldraw.com/creditpacks/).

If you need extra credits for a single instance, you can purchase a One-time add-on pack. Credits in these packs are non-recurring; credits do not expire, and you can use them at any time.

If you need extra credits on a recurring basis, you can purchase a 365-day or 30-day AI credits subscription. Credits in these packs are recurring; credits reset at the start of each month and will not carry over.

Purchased credit packs will appear in the Add-ons tab in the [AI Credits section in My Account](#). In this list, you can manage recurring credit pack subscriptions (cancel, edit billing, reactivate) and view non-recurring (one-time-purchase) credit packs.

## How do I redeem the credit packs I purchased in store or online?

Credit packs purchased directly from the Corel website will be automatically applied to the account associated with the email used to purchase the pack.

Credit packs purchased from an authorized reseller can be redeemed online by entering the associated redeem code at [www.coreldraw.com/getcoreldraw](http://www.coreldraw.com/getcoreldraw). The redeem code can be found in your order confirmation or receipt.

## Volume Licenses

### How do credits apply to volume (multi-seat) licenses?

For volume licenses (both subscription and perpetual licenses with maintenance), recurring credits are allotted to users based on seat count. Each member will be given access to an allotment of credits for each seat assigned to them. To manage credits distributed to members, go to the [Team Products section in My Account](#).

- Add credits to a member by adding a seat:
  - Select the member and choose “Add Seats”.
  - Each seat added will increase the member’s credit balance by a set amount.

- If the credit amount in the license balance has been partially consumed, the member's new balance will be reflected on the first of the month.
- Remove credits from a member by reducing their seats:
  - Select the member and choose "Add Seats".
  - Each seat removed will reduce the member's credit balance by a set amount.
  - Removing seats does not immediately move credits back to the admin account. Credits will be reallocated back to the admin with the next monthly recalculation.

As with all recurring credits, these credits will reset on the first day of the month; they do not carry over to the next month.

### **How do credits apply to Corel Academic Site Licenses (CASL)?**

Corel Academic Site Licenses do not include an AI credit entitlement at this time.

### **As an admin, can I purchase additional credits for my team?**

No. At this time, credit packs can only be purchased for individual use. If you purchase an add-on credit pack, the credits will only apply to your total credit balance.

If you are an Admin, your personal credit balance from non-volume products is not shared with team members. Only the credits associated with the volume license products will be available to the team members of that product.

If a member of your team requires additional credits, they will need to purchase a credit pack using their own account. As an alternative, an admin may purchase a credit pack from an authorized reseller and provide the redeem code to the team member for use.

### **Our company does not allow the use of AI. How can I disable AI features?**

Installation files provided with Business and Education licenses with support for software deployment include a setup option during the administrative installation to disable generative AI features in the installed applications. More information about software deployment of the CorelDRAW 2026 products can be found in the [Deployment Guide](#).
